

Diamond designs - familiar look, better built

At first glance Prowler Proof's Diamond designs look similar to other security screens.

But have a closer look. You'll soon notice that there are no visible joints – it looks and feels like the security screen is made in one piece. Which is not far from the truth Prowler Proof's security screens are not held together by screws or rivets, they are welded. This adds strength... and good looks.

You can choose between Welded – where the grille and frame are the same, and you can select the colour you prefer from our extensive selection, or SnapLock – where you can choose any colour frame to complement the black grille. Both Diamond designs have been tested and passed the Australian Standard for security AS 5039.

- Welded – no screws or rivets
- Very high security
- Good transparency
- Excellent airflow
- Insect protection
- Heavy duty aluminium frame & mesh

Colours

Prowler Proof is the only security screen manufacturer that gives you 100 standard colours and more than 200 optional colours to choose from.

Design options

Welded Diamond

Welded Diamond is our most popular style. It is stronger, looks better and is more corrosion resistant than any other brand of diamond design on the Australian market. The frame and the mesh are both the same colour... You get 100 standard colours and more than 200 optional colours to choose from.

SnapLock Diamond

With the same performance as Welded Diamond, the SnapLock Diamond is a unique product that allows you to match any colour frame to its black grille. Black grille is more transparent and blends in better with the look of most homes.
