Prowler Proof

Prowler Proof is Australia's most advanced manufacturer of security screens. The quality is unmatched, whether you prefer the premium ForceField®, the smart Protec, the low maintenance Guardian®, the traditional Diamond designs, the classic Heritage designs ... or need to keep small intruders out with an insect screen.

There is a Prowler Proof screen for every door or window opening in your home. ForceField®, Protec, Guardian®, Diamond designs and insect screens are available for hinge doors, sliding doors and windows – custom-made to your requirements. The Heritage design series offers a wide variety of door designs and sizes.

It's the finishing touches that make the difference, with high strength welded corners, our exclusive concealed fix extrusions with H.I.T™, and a range of optional accessories. All our screens deliver seamless aesthetics and can be manufactured to suit your home perfectly.

ForceField®

The marine grade stainless steel ForceField® is the strongest and best looking security screen on the market.

Protec

Protec's mesh is a single aluminium sheet, perforated and powder coated. It's smart security.

Guardian®

The fine weave stainless steel Guardian® sets the standard for fall prevention fixed window screens.

Insect

Prowler Proof's insect screens are welded with robotic perfection. A high quality fibreglass gauze is standard.

QUICK REFERENCE:

- Welded – no screws or rivets
- Maximum security
- Maximum transparency
- Maximum airflow
- Insect protection
- Heavy duty aluminium frame
- Marine grade 316 stainless steel mesh
- More than 300 colours
- Corrosion resistant
- Low maintenance
- 10 year replacement warranty

ForceField® - stainless strength

It's almost invisible, still it's near impossible to get past. Like all other Prowler Proof products, ForceField® is welded instead of being held together by screws or rivets. A weld is stronger than any screw or rivet... and it looks better too. ForceField® is the strongest and best looking security screen on the market.

The assembly system is unique to Prowler Proof. The heavy duty aluminium frame and the marine grade stainless steel mesh are joined together in a mechanical and

ForceField's marine grade stainless steel mesh is the ultimate in security, transparency and airflow.

chemical bond. It is virtually unbreakable and provides complete insulation of the two metals... eliminating a major cause of corrosion.

ForceField® is pure class. When it comes to security, transparency and good looks, it has no peers.

- Insect protection
- Heavy duty aluminium frame
- Heavy duty aluminium perforated sheet mesh
- More than 300 colours
- Corrosion resistant
- Low maintenance
- 10 year replacement warranty

Protec - smart security

Protec is smart security. It's built in our hi-tech factory as an all-aluminium design with Prowler Proof's famous welded corners. The mesh is a single aluminium sheet, perforated and powder coated to the high standards you'd expect from Prowler Proof. The perforations are exactly the right size – small enough to keep insects out, big enough to allow excellent airflow and transparency. The mesh is joined to the heavy duty aluminium frame in a process unique to Prowler Proof.

Protec's mesh is made from a single, solid 1.8 mm aluminium sheet. Secure, good looking and affordable.

Protec is one of Australia's strongest and best looking security screens. The frame comes in over 300 colours to suit the black mesh. If you're looking for smart security, you can't go past Protec...

Guardian® - fall prevention window screens

Guardian® fall prevention screens create safe places for windows at height. Certain windows greater than 2.0m from the outside ground level need to meet the National Construction Code (NCC) fall prevention requirements, by using a restricted opening device, or if you want to use the full extent of your windows an approved screen, such as Guardian is essential.

Guardian mesh is bonded into a fully welded, heavy duty aluminium frame.

With Guardian's fine 304 stainless steel architectural mesh, views are seemingly unrestricted. It delivers greater natural airflow to help cool and freshen any room.

Because Guardian features stainless steel mesh, it's low maintenance, and strong enough to stand up to the rigours of children and pets.

Its appearance is perfectly matched to our ForceField® security screens for the ultimate in full home protection.

9

QUICK REFERENCE:

- Welded – no screws or rivets
- Exceeds NCC fall prevention requirements
- Maximum transparency
- Maximum airflow
- Insect protection
- Heavy duty aluminium frame
- Architectural grade 304 stainless steel mesh
- More than 300 colours
- Corrosion resistant
- Low maintenance
- 10 year replacement warranty

Insect screens - fresh air, all to yourself

Just like any other insect screen, a Prowler Proof insect screen is designed to keep small intruders out. That's where the similarities end. Like all other Prowler Proof products, our insect screens are welded with robotic perfection. You'll enjoy the extra strength and the great look of the welded corners every day.

The standard gauze is high quality, long lasting fibreglass but you can take it even further. An aluminium or a stainless steel gauze offers extra strength as well as protection from bushfire. A micro fibreglass

The corners look good...and add strength to Prowler Proof's insect screens.

gauze will keep out even the smallest insects and our pet safe polyester mesh is an economical solution if you have pets.

Thanks to Prowler Proof's automated 7-stage powder coating process, our insect screens are available in 50 standard colours... with more than 250 further options if your favourite colour is not within our standard range.

Access control

Hinge window - easy access and high security

Think of the possibilities for an opening security window screen.

Being able to open your security screen allows for easy access. Be it passing food into an entertaining area, or in case of an emergency.

The biggest advantage, on a day to day basis is the accessibility to open the screen to clean both screen and window glass, for a perfect view.

Prowler Proof's unique system includes European designed hardware, with high security multi-point locking. This hardware has been proven to perform time after time, so you can be assured that your screen will open when you need it to, and close properly

Prowler Proof's Hinge window is available with both ForceField® and Protec security mesh.

everytime. Like all Prowler Proof security products, our Hinge window has been tested and passed the Australian Standard AS5039, so you can be confident that the screen will only open when you want it to.

Our unique fixing channel with H.I.T.™ – Hidden Installation Technology, not only hides all the fasteners so your screen doesn't look like its been added as an afterthought, it locks all of them away, removing tampering opportunities.

The purpose designed, dual action handle removes the chance of accidental opening,

13

REMOVABLE SASH

Full access to the screen and window for cleaning.

HIGH SECURITY LOCKING CAMS

Multi point locking for maximum security.

FLUSH DUAL ACTION HANDLE

Dual action prevents accidental bump opening, so you know your screen can't be accidentally opened and your house left unsecured.

MAXIMISED DAYLIGHT

The custom designed frame and sash ensure that the hinge window does not restrict the opening, and maximises the daylight through the window.

EURO-GROOVE EUROPEAN HARDWARE

Concealed hardware means intruders can't see any points to attack, and euro-groove hardware is proven to perform time after time, so you know your screen will open when you need it to.

It's the finishing touches that make the difference

These purpose designed extrusions create a seamless look for your new security door. The recessed fixing channels feature H.I.T.™ - Hidden Installation Technology making them tamper resistant, as it makes it harder to get pliers around screw heads. The channel also comes with a cover strip, hiding fasteners out of site. The receivers all include finger grips, making opening and closing of doors easier, particularly for the elderly and young children. End caps complete the looks, by closing the gaps that allow light or insects in. The sliding door interlocks have been tested to the Australian Standard AS5039, and the receivers increase the strength of joined assemblies by up to six times that of existing installation methods.

FINGER GRIP
Easy opening and closing with built in finger grips.

END CAPS
End caps close gaps from both light and insects.

COVER STRIPS
All fasteners are concealed with cover strips.

MOHAIR
Receivers include mohair giving a soft close mechanism and they stop rattling noises.

Diamond designs - familiar look, better built

Security tested

Bushfire (with metal gauze)

Insect protection

Access control

Fall prevention

At first glance Prowler Proof's Diamond designs look similar to other diamond grille screens. But have a closer look. You'll soon notice that there are no visible joints – it looks and feels like the security screen is made in one piece. Which is not far from the truth. Prowler Proof's security screens are not held together by screws or rivets, they are welded. This adds strength... and good looks.

You can choose between Welded – where the grille and frame are the same, and you can select the colour you prefer from our extensive selection, or SnapLock – where you can choose any colour frame to complement the black grille.

Both Diamond designs have been tested and passed the Australian Standard for security AS5039.

Heritage designs - classic doors, modern technology

Bushfire (with metal gauze)

Corrosion tested

Insect protection

Prowler Proof's Heritage doors add character to any home. Like all other Prowler Proof products they are not held together by screws or rivets, but welded. You'll appreciate the welded corners and the added strength.

Our Heritage doors are made with rust-free cast aluminium panels which are welded on all contact points to a heavy duty aluminium frame. Coupled with Prowler Proof's 7-stage powder coating finish,

the Heritage designs are virtually immune to corrosion and will give you many years of trouble-free use.

There is a wide range of designs to choose from...all designs are available in 50 standard colours and more than 250 other colour options. There is sure to be a Heritage design to suit your home.

The sign of security

Your product should have one of these stickers. The presence of this sticker means that it has passed all the required tests to make it a security compliant product.

H.I.T.™ - Hidden Installation Technology
 H.I.T.™ is our design methodology for our next generation of security products. It focuses on four key principles:
Aesthetics - No exposed fixing points means your product looks better. Your product looks like it's meant to be there, not added on as an after thought.
Tamper proof - By removing access to fixing points, we've removed the ability for fasteners to be tampered with.
High performance - Because of the advanced fixing design, the products have high attack resistance, and have undergone and exceeded the requirements of the Australian Standards for security AS5039 and AS5040.
Safe to install/Safe to use - Safety is at the forefront of everything that we do. Our new designs make the process of installation safer for our dealers, and the designs are safe for your whole family to use.
 H.I.T.™ is exclusive to Prowler Proof and all of our new products are being designed under this methodology. It's just another way we're Creating a Safer Place for you to live.

Casement

Only Prowler Proof gives you 50 standard colours and more than 250 optional colours to choose from.

Prowler Proof's welding robots work with an accuracy of one tenth of a millimetre - producing an extremely strong and almost invisible weld.

A welded security screen is stronger... and looks better!

A WELD CAN BE STRONGER THAN THE PARTS JOINED

The main difference between Prowler Proof and other security screens is that all Prowler Proof products have a fully welded frame. A weld joins two parts together, a screw or a rivet merely holds two parts together. A weld can actually be stronger than the parts joined...and it looks better than screws or rivets, too.

SEAMLESS CORNERS

With its seamless welded corners a Prowler Proof security screen looks like it's made in one piece. It feels that way, too. You will immediately notice the difference when you compare Prowler Proof with a product that is held together by screws or rivets. Prowler Proof feels stronger because it is stronger.

NO RISK OF CORROSION CAUSED BY METALS INTERACTING

Whenever two different metals interact, there's a risk of corrosion. With no screws or rivets to penetrate the frame and the mesh in order to keep them together, this risk is eliminated in a Prowler Proof security screen. Another huge advantage of a welded security screen.

With its welded corners
Prowler Proof looks like it's
made in one piece.

PROVIEW

Smart production means value for money

AUSTRALIA'S ONLY AUTOMATED PRODUCTION LINE

Prowler Proof security screens are premium in every respect...except for the price. The manufacturing processes in our world class factory are fully automated, enabling us to produce a superior product at a competitive price. Prowler Proof is outstanding value for money.

COMPUTER CONTROLLED FROM A-Z

From the moment an order is placed in Prowler Proof's online ordering system, computers keep constant track of every detail. Thanks to the computerised systems our quality and reliability are industry leading.

ROBOTS DON'T MAKE ERRORS

Prowler Proof's factory is not short of dedicated and skilled craftsmen. But some tasks are best left to machines. No human can match the one-tenth-of-a-millimetre accuracy of our welding robots or the speed and quality of our 7-stage automated powder coating system.

Prowler Proof's 7-stage automated powder coating system gives you 50 standard colours to choose from...and more than 250 further colour options.

An internal test simulates a pull that no potential intruder would be capable of.

Above and beyond the standards...

BEATING BURGLARS

Prowler Proof products meet or exceed all relevant Australian Standards...as well as some even tougher international standards. These tests include simulated burglar attacks with a knife, a screwdriver, cutting pliers... kicking and pulling. No match for ForceField®, Protec or any Diamond design.

CYCLONES

Imagine being hit by 5 steel bullets less than a centimetre in diameter at 170 km/h plus. Or a 4 kg timber block at more than 100 km/h. That is what is required by the Australian Standards cyclone test and Prowler Proof ForceField® passed with flying colours. ForceField® has also passed the American Standards hurricane test.

SALT WATER, FIRE AND SUN

All Prowler Proof products have survived a 1,000 hour salt spray test with no signs of corrosion. ForceField® is approved for buildings in bushfire prone areas...most other Prowler Proof products just need the optional stainless steel insect gauze to comply. ForceField® and Protec have been WERS tested and achieved a 4.5 - 5 star energy rating.

QUALICOAT

Qualicoat is an internationally recognised, third party accreditation scheme for powder coating. Prowler Proof is the only security screen manufacturer to have been accredited by Qualicoat. This gives you confidence knowing your screen is powder coated to the standard, and will last the test of time.

This internal test simulates an attack with a screwdriver.

Prowler Proof is Australia's only welded security screen...and the only security screen made in a world class fully automated factory. These two facts combine to make Prowler Proof a superior product at a competitive price.

Proud member of

The closer you look,
the better it gets...

Prowler Proof welcomes warranty claims because they give us a chance to improve our products and the relationship with our customers.

We invite you to have a really good look at our warranty – it's full of pleasant surprises...

You get a brand new product

The Prowler Proof warranty is Australia's only replacement warranty. Instead of a repair job, you will get a brand new product.

You don't have to do a thing

The moment your Prowler Proof product leaves our factory, you're covered by the warranty. You don't even need to keep your receipt – all products have a serial number that we can track in our system.

Claiming is easy

It's easy to claim. Use the online claim form on our website and we'll respond by the next business day, if not before. Or contact the dealer who installed your Prowler Proof product.

Clean at your leisure

Prowler Proof products are made to last. We expect you to look after your Prowler Proof product like you would any other major investment, but we have no rigorous cleaning schedules laid out.

For a closer look at the Prowler Proof warranty, please visit www.prowlerproof.com.au.
